

# C's That I'm Looking For...

---

## Conceptual Understanding

- do you understand the physics of the situation?
- are you able to apply the **concepts**?

## Critical Thinking

- after obtaining a solution, **does it make sense**?
- after obtaining a wrong answer, why is it incorrect?
- why might my design not work?

## Computational Literacy

- can I **computationally** solve the problem?
- can I become more efficient by using **software**?

## Communication Skills

- after I obtained an answer, can I effectively **communicate** my result?
- can I **convince** someone that my **design** is the best?
